Permit No. U.W. _____ for State Engineer

THIS IS TO CERTIFY that I have examined the foregoing application and do hereby grant the same subject to the following limitations and conditions:

This application is approved subject to the condition that the proposed use shall not interfere with any existing rights to groundwater from the same source of supply and is subject to regulation and correlation with surface water rights, if the ground and surface waters are interconnected. The use of water hereunder is subject to the further provisions of Chapter 169, Session Laws of Wyoming, 1957, and any subsequent amendments thereto.

Granting of a permit does not guarantee the right to have the water level or artesian pressure in the well maintained at any specific level. The well should be constructed to a depth adequate to allow for the maximum development and beneficial use of groundwater in the source of supply.

If the well is a flowing artesian well, it shall be so constructed and equipped that the flow of water may be shut off when not in use without loss of water into sub-surface formations or at the land surface.

Some type of artificial development (collection box, perforated pipe, or cribbing) must be constructed to appropriate water from a spring.

Additional Conditions and Limitations may apply and will be found on attachment sheets.

Approval of this application may be considered as authorization to proceed with construction of the proposed well or spring.

Completion of construction and completion of the beneficial use of water for the purposes specified in Item 4 of this application shall be made by December 31, 20_____.

A completed Form U.W. 6, Statement of Completion and Description of Well or Spring, shall be submitted to the State Engineer's Office within 30 days of well completion.

The amount of appropriation shall be limited to the quantity to which permittee is entitled as determined at the time of proof of application of water to beneficial use.

Witness my hand this _____ day of _____, A.D. 20_____
